

Only the merest hint of a fine aluminium edge gives away the fact that something rather clever has happened to textile graphic display systems. Frameless does it all with such style that you simply don't realise it's there. Ideal for exhibitions, wall graphics and many other uses, the system can be supplied in single- or double-sided and even light box formats.

Double sided slimline extrusion: FL6ECO

Display two prints back-to-back in the double sided slimline extrusion. Suitable for ceiling hung displays to a maximum 700 x 700mm.

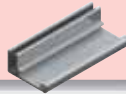

Code: **FL6ECO**
Finishes: **SA**

Single sided extrusion: FL5ECO

Display single sided graphics in this frameless extrusion. Suitable for wall mounted frames. To a maximum 3M x 3M.

Code: **FL5ECO**
Finishes: **SA**

Double sided extrusion: FL6

Suitable for freestanding. Large frame sizes may require additional internal supports – please contact our sales team for details.

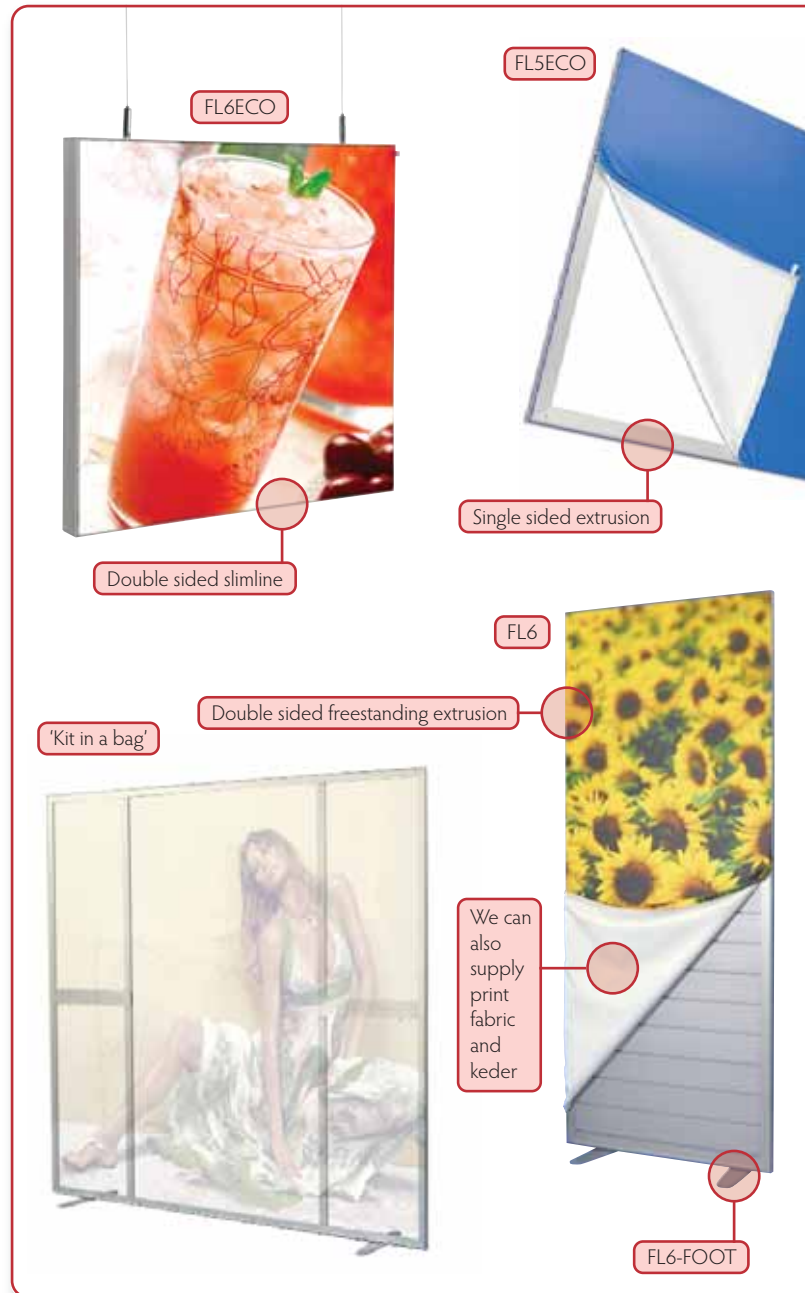

Code: **FL6**
